

# Hailiang Zhao

## CCNT Lab

College of Computer Science and Technology  
Yuquan Campus, Zhejiang University  
<http://hliangzhao.me>

Tel: +86-15172392385

Email: [hliangzhao@zju.edu.cn](mailto:hliangzhao@zju.edu.cn)

Addr: No. 38 Zheda Road, Xihu District,  
Hangzhou, China 310027

## BIOGRAPHY

Currently I am a third-year Ph.D. student of College of Computer Science and Technology, Zhejiang University (<http://www.zju.edu.cn/>). Before my Ph.D. career, I was an undergraduate student from Wuhan University of Technology (<http://www.whut.edu.cn/>) and received my B.Eng. degree in Computer Science and Technology on June, 2019. In September 2019, I was admitted to study for a Ph.D. degree in Zhejiang University under the supervision of Prof. Shuiguang Deng (<https://person.zju.edu.cn/shuiguang>) without entrance examination.

## EDUCATION

*PhD student*, Computer Science and Technology  
Zhejiang University, Hangzhou, China

Sep 2019 - Jun 2024

*Bachelor of Engineering*, Computer Science and Technology  
Wuhan University of Technology, Wuhan, China

Sep 2015 - Jun 2019

## RESEARCH INTERESTS

I am interested in **Cloud & Edge Computing**, **Network Management**, and **Distributed Systems**. Currently I am focusing on:

- **Job Scheduling & Online Resource Allocation.** Cluster schedulers are key to realizing improvements in resource utilization for the cloud-native apps. Current cluster schedulers rely on heuristics that prioritize generality, ease of understanding, and straightforward implementation over achieving the ideal performance on a specific workload. However, they ignore readily available information about job structure (i.e., internal dependencies) and efficient parallelism for jobs' input sizes. How to design a better online resource allocation algorithm (mechanism) is of importance.
- **AI-driven Optimization.** In our *Edge Intelligence paper*, we divide Edge Intelligence into *AI for edge* and *AI on edge*. The former focuses on providing a more optimal solution to the key concerns in Edge Computing with the help of popular and resultful AI technologies while the latter studies how to carry out the entire process of AI models, i.e., model training and inference, on edge. What I put emphasis on is that how to apply AI-based models, especially reinforcement learning and graph neural networks, to improve the QoE.

## HONORS

Outstanding Postgraduates Award of CCNT Lab & College of CST, Zhejiang University, Oct 2020  
 Doctoral Freshman Scholarship of Zhejiang University, Sep 2019  
 Best Student Paper Award of the 2019 IEEE International Conference on Web Service, July 2019  
 Outstanding Graduate of Wuhan University of Technology, June 2019  
 The Excellence Award of Wuhan University of Technology, Oct 2018
